HEMEROCALLIS

Plants true to name to the best of my knowledge and are guaranteed to arrive in good condition. Should any losses or mistakes occur I will gladly make adjustments or replacements.

Terms are cash with order. Orders of \$2.00 and more are prepaid to third zone from Des Moines. Minneapolis, Chicago, St. Louis, Kansas City and Lincoln, Nebr., are in third zone from Des Moines. If you live beyond these cities include 5% extra of order for postage. On orders under \$2.00 add 25c extra for postage and packing charge. Orders will be sent by parcel post unless otherwise requested.

The season of bloom is from the middle of May till September, foliage always green and attractive, varying in shades of green, in height, in width and carriage according to variety.

Can be transplanted any time the ground is not frozen without loss but best time to plant is spring and after clones have bloomed.

I endeavor to give plants or divisions as large as possible for the price and all should bloom if planted early in season.

PREMIUMS: On all orders of Hemerocallis, I add an extra gift plant, the value in proportion to amount of order. When ordering, list several from which I will choose whenever possible.

- AFTERGLOW** (Stout) — Deciduous. Soft shade of apricot buff, faint rose tint in throat, long season of bloom, good evenings. 3 feet, July, August... **\$1.00**

HOSTA

Hardy herbaceous perennials with handsome green or variegated foliage. Flowers lily-like on graceful stems.

Do best if grown in shade or partial shade, ideal for north side of building or shady place among foundation planting or shady place in garden.

Should be grown in rich, well manured soil and watered well in dry weather for best results.

Can be planted any time from spring till fall. Plants shipped soon as possible after May 1st.

CAERULEA—The true variety has the bluest flowers of any of the Hostas. It is the next largest in size of flower to *H. plantaginea* with very round puffed out bells of lavender blue distinctly penciled on the inner surface with deeper color. The leaves are glossy green of large size and graceful form. Use for border planting with pale yellow *Hemerocallis* in the background. July-August.....75c

ERROMENA—This Hosta has been identified through illustrations and description in "Bailey Herbarum" as Hosta Erromena. Listed and sold also under names Japonica and Lancifolia Undulata.

It is a robust growing plant with dark green leaves with prominent curved veins either side of midrib, blade of leaf about 8 to 10 inches long, about 4 inches broad. Flowers pale lilac bells on stalks 2½ feet tall, blooms in July **75c**

FORTUNEI—A very fine outstanding spe-

cies with good size glaucous leaves. Makes a fine specimen plant. Foliage not quite as large and more pointed than Seiboldiana. Lavender blue bell shaped flowers on stems 2 ft. or more in July75c

Hosta Fortunei Alba Marginata

FORTUNEI ALBO-MARGINATA

This tall, showy plantain-lily has arching leaves two feet long that sweep over to the ground. The leaf blade, six inches by ten inches, is shiny green, edged with a one-half band of white. The very pale lavender flowers, almost white, are dainty, bell-shaped, spread along a three-foot stalk and start blooming in early July. Each\$2.00

FORTUNEI VIRIDIS MARGINATA.—

Large pointed leaves of olive green with a broad margin of dark green. Flowers are bell shaped and lavender pink in color and blooms in July on stalks 2 ft. Plant turns dark green late in summer\$1.50

HONEY BELLS (Bristol Nurseries)—This is a hybrid hosta originated by Alex Cumming. The trumpet like flowers are an inch and a half across of soft lavender-lilac shade carried on 3 ft. spikes. Foliage is of good size similar in shape and color to Plantigena. Blooms in July and August....\$1.50

LANCIFOLIA ALBO-MARGINATA—The narrow-leaved plantain-lily, is a rapid grower. The slim light green leaves have a white line along the edges of the narrow blades. The leaves are about eight inches to twelve inches long. The flowers are lavender, with white lines, bell-shaped, on two-foot stalks in the middle of August. This makes a bushy growth of leaves and a thick border plant. It is a very pleasing plantain-lily and desirable to have as it blooms vigorously and freely75c each

• The narrow-leaved plantain-lily (*Hosta lancifolia albo-marginata*).

LANCIFOLIA AUREA — Lance leaf variety, same form as Lancifolia Fortis. Leaves are yellow in spring which turn light green later in the season.

\$1.00

LANCIFOLIA FORTIS—Lance leaf plantain lily. Long lance like foliage, dark green in color, produced in abundance. Flowers are violet. Bloom September and October on stems two feet tall, very floriferous and especially welcome as it is in bloom over a long period in the fall when flowers are scarce **50c**

LANCIFOLIA TARDIFLORA — A rare variety that is very late blooming. The leaves are slender and a deep green in color. The flowering stalk is strong with wide open blooms of delicate lavender. Rather tender and should be heavily mulched in the north for winter **\$2.50**

MINOR ALBA — Dwarf form. Splendid for rock gardens or edge of shady border. Foliage bright green. Flowers white, bell like in form on stems 12 inches tall. Fine for cutting. Blooms in September **\$1.00**

NAKAIMO — Species from Japan with light green round leaves that are pointed, of good size. Plant grows 12 to 15 inches tall. Deep lavender flowers early midseason on stalks 2 ft. tall. Often blooms second time later in season after plant is established.
Each\$1.50

The short-cluster plantain-lily (Hosta sieboldiana) with the wavy-leaved Hosta undulata at right.

SIEBOLDIANA — The large, broad rounded leaves are overlaid with a heavy gray blue luster. The creamy pale lavender flowers have heavy substance and are borne on short clustered stalks above the foliage. In bloom about the first of July.....\$1.00

Hosta subcordata Grandiflora

SUBCORDATA GRANDIFLORA — Also listed as Plantaginea. Large yellowish green leaves on long stems. Largest blooms of all Hosta. Pure white, lily-like in form. In bloom August, September. 24 inches.....**60c**

UNDULATA UNIVITTATA. The heavy, waxy, dark green leaves are very decorative with wide creamy, white stripe in the center of the leaves, the long bell shaped flowers, lavender shade. Bloom in July on stems 30 in. tall **50c**
